CAREER OBJECTIVE

B.Tech Computer Science (Cyber Security) graduate with knowledge of Python, cloud fundamentals, networking, and IT operations. Seeking an entry-level opportunity to apply analytical thinking, problem-solving, and technical skills while contributing to reliable IT operations and continuous service improvement.

EDUCATION

Rajeev Gandhi Memorial College of Engineering and Technology	2022 - 2026
B.Tech in computer Science Engineering(Cyber Security) CGPA - 8.01	Nandyal

Narayana Junior College	2020 - 2022
Higher Secondary(XII) - 70.3	Anantapur

Narayana Concept School	2019 - 2020
Secondary(X) - 100	Anantapur

SKILLS

Programming language	python,sql
Databases	MYSQL
Cloud - Networking	AWS Cloud Fundamentals,Cloud Security Basics,Computer Networks,TCP/IP
Core Concepts	Object - Oriented Programming(OOP),Data Structures,Incident Analysis,Problem Solvin
Tools	Git,Github,VS code
SoftSkills	Analytical Thinking, Communication, Team Collaboration, Adaptability

EXPERIENCE

Cyber Security-Internship	Feb - Mar 2026
Elevate Labs	<i>Virtual</i>

- Developed Python programs to automate technical tasks and improve troubleshooting skills.
- Monitored and analyzed system and network activities while documenting findings and validating results.
- Collaborated with the team to resolve technical issues, document solutions, and ensure timely project delivery.

PROJECTS

Trust Aware DDoS Detection System for IoT Networks	December 2025 - April 2026
---	----------------------------

- Collected and analyzed IoT network traffic to identify abnormal system behavior.
- Developed a CNN-GRU based detection model to classify normal and malicious traffic.
- Evaluated model performance using Accuracy, Precision, Recall, and F1-Score, reducing false-positive alerts.

Cloud-Based Secure Identity Authentication System	June-August 2025
--	------------------

- Designed a secure cloud identity authentication framework for user access management.
- Implemented encryption and role-based access control to improve authentication security.
- Validated secure authentication workflows to strengthen cloud data protection and communication security mechanisms

ACHIEVEMENTS

- AWS Certified Cloud Practitioner
- Python completion certificate
